

Demonstration Project on the Recycling of Waste from Semiconductor Manufacturing in South Korea

Sepa-Sigma Inc.

Kitakyushu: “Support for the development of environmental business in Asia of small- and mid-sized companies”
(FY2012) 66

As part of the development of technology for recycling waste from semiconductor manufacturing in South Korea, demonstrate Sepa-Sigma’s pore diffusion film separation technology, and expand sales outlets to major semiconductor manufacturers through South Korean device manufacturers.
